Many allergy patients get **lost in the grass.**

Let GREER® help you get in touch.

Subcutaneous immunotherapy (SCIT) can be difficult for many of your grass allergy patients to accept and maintain. Previously diagnosed patients who refused or discontinued SCIT may not be coming into your practice for injections. They are not receiving the immunotherapy they need and may still be experiencing intolerable allergy symptoms.

Request tools from a GREER Allergy Sales Consultant to identify patients who still need help.

Call 1.800.378.3906 or, for the quickest response, visit

Time is money.

ElectroLube™ saves you time.

ENT surgeons use Electro Lube™ on their suction cautery devices to prevent sticking and clogging. They have found using Electro Lube™ cuts their procedure time significantly by practically eliminating the “stop – start” normally associated with suction cautery in adenoid, tonsil and thyroid procedures.

“ I am using Electro Lube™ on my suction cautery instruments. Electro Lube™ simply saves me a tremendous amount of time and frustration not having to stop and clean the lumen of my device from eschar build-up. I love the product and recommend it to all my associates.”

*John O'Day, Medical Director
Head and Neck Specialty Group
of New Hampshire*

Less Sticking

Less Tearing

Less Eschar Build-up

ElectroLube™ saves time and money.

- Prevents bleeders caused by instrument sticking thus reducing thermal damage
- Enhances conductivity for better cauterization performance
- Saves time and frustration cleaning eschar build-up during and after surgery

Create non-stick electrocautery instruments:

- For ENT procedures using: Suction Coagulator, Coblation Devices and Bipolar forceps

spirit of excellence

Office ENT procedures made possible by Richard Wolf's ENDOCAM® Performance HD office video system

- Increase your effectiveness with the ability to perform in-office balloon procedures utilizing:
 - >> High definition imaging in 720p or 1080i resolution.
 - >> Latest LED light source technology.
 - >> Sharp color reproductions.
- Built-in USB port allows recorded images and videos to be exported to an external device.
- Perfect complement to Richard Wolf Sinus Endoscopes and many in-office balloon sinuplasty systems.

For more information or to schedule an evaluation, contact Richard Wolf Customer Service at 800.323.WOLF (9653).
